

What is a biome?

What is a tropical rainforest?

LEARN AT **CHESTER ZOO**

What are biomes?

Biomes are areas of the planet with similar climates, animals and plants. The five major types are:

Aquatic (water)

Grassland

Forest (woodland/rainforest)

Desert

Tundra

Different types of forest

Boreal (Taiga or snow forest)

Rainforest

Temperate forest: coniferous forest

Temperate forest: deciduous forest

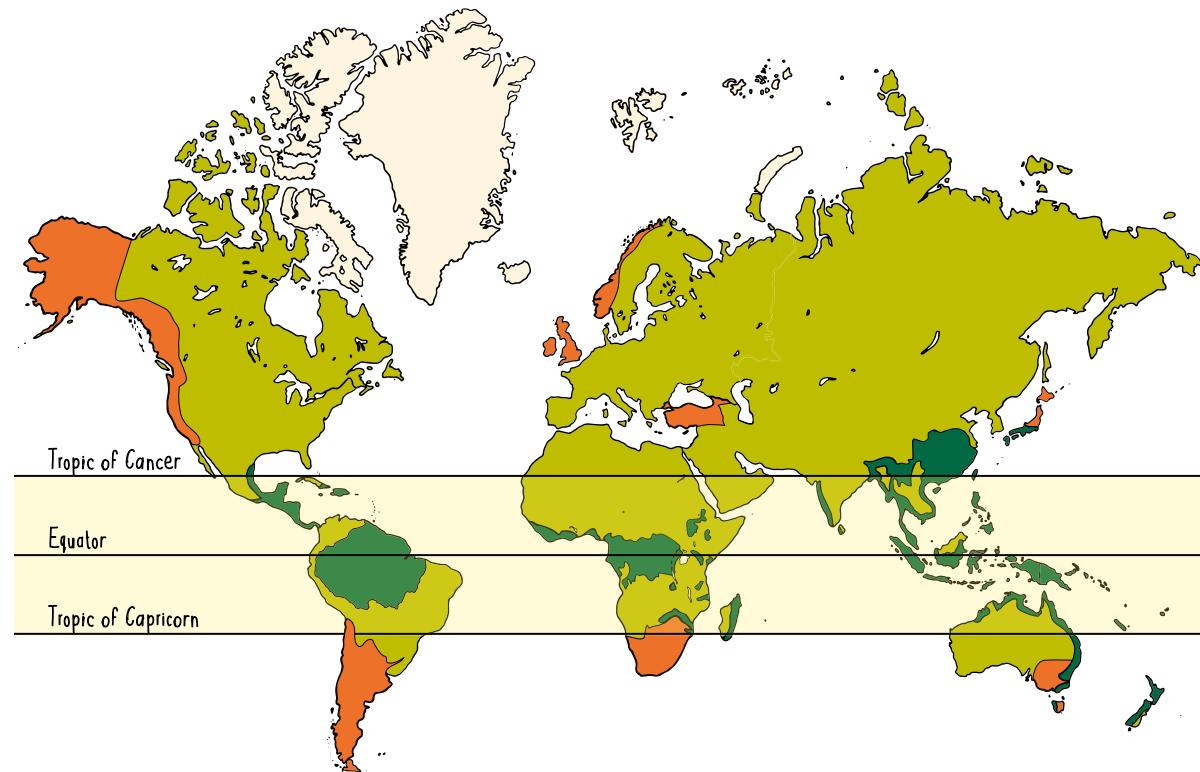

Where are rainforests found?

There are two types of rainforest. The tropical rainforest is shown in green and the temperate rainforest is shown in orange.

Referring to the Equator and the Tropics of Cancer and Capricorn:

Where is the temperate rainforest found?

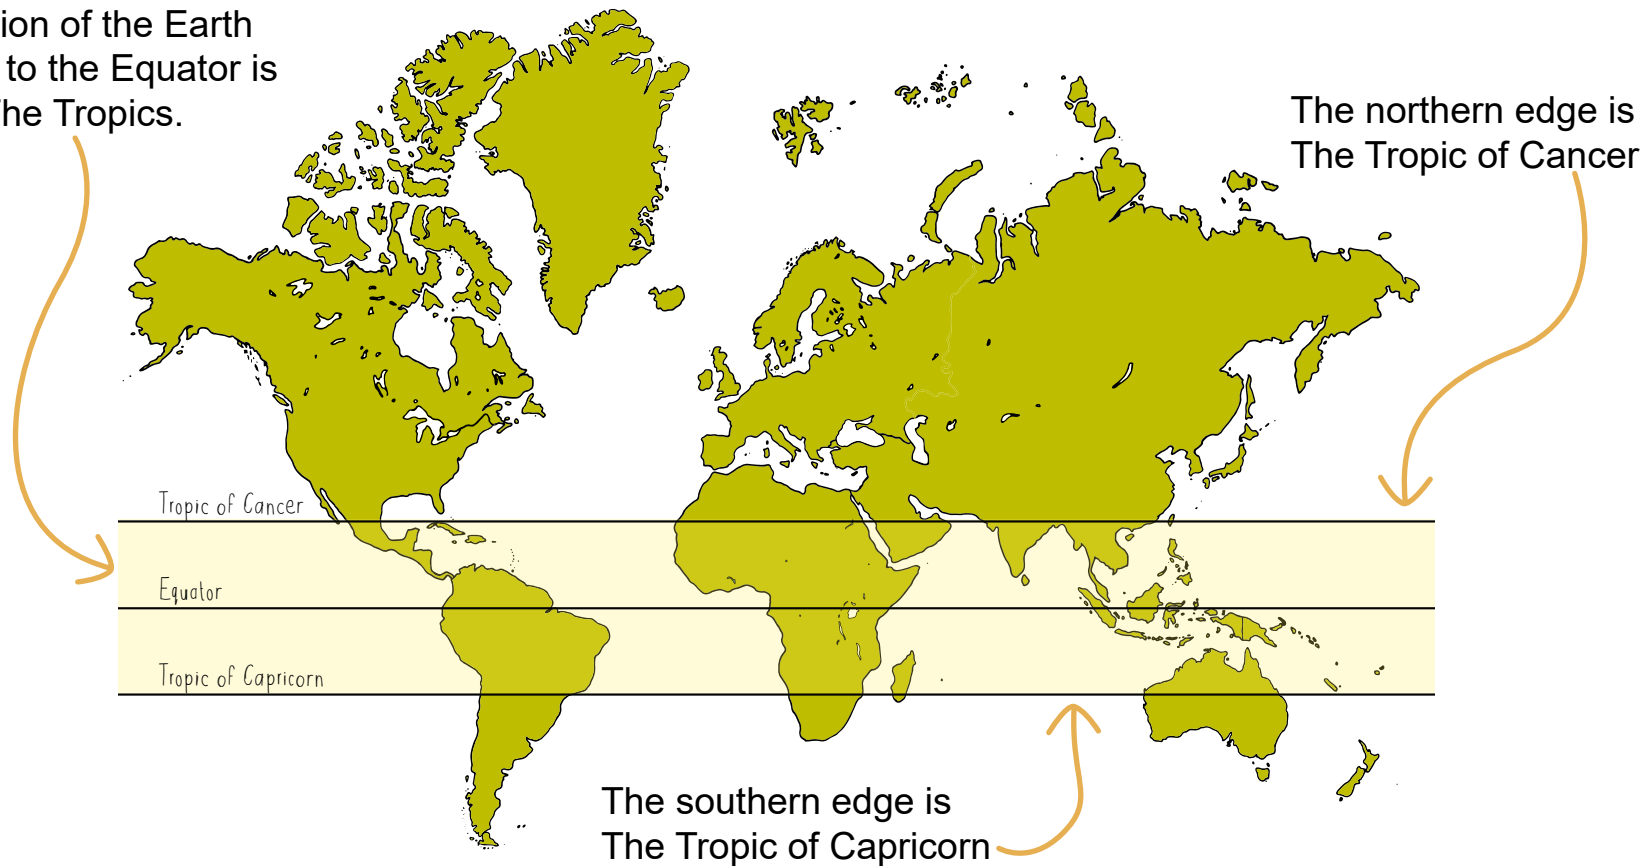

Where is the tropical rainforest found?

Why do you think the tropical rainforest is found within the Tropics?

Tropics of Cancer and Capricorn

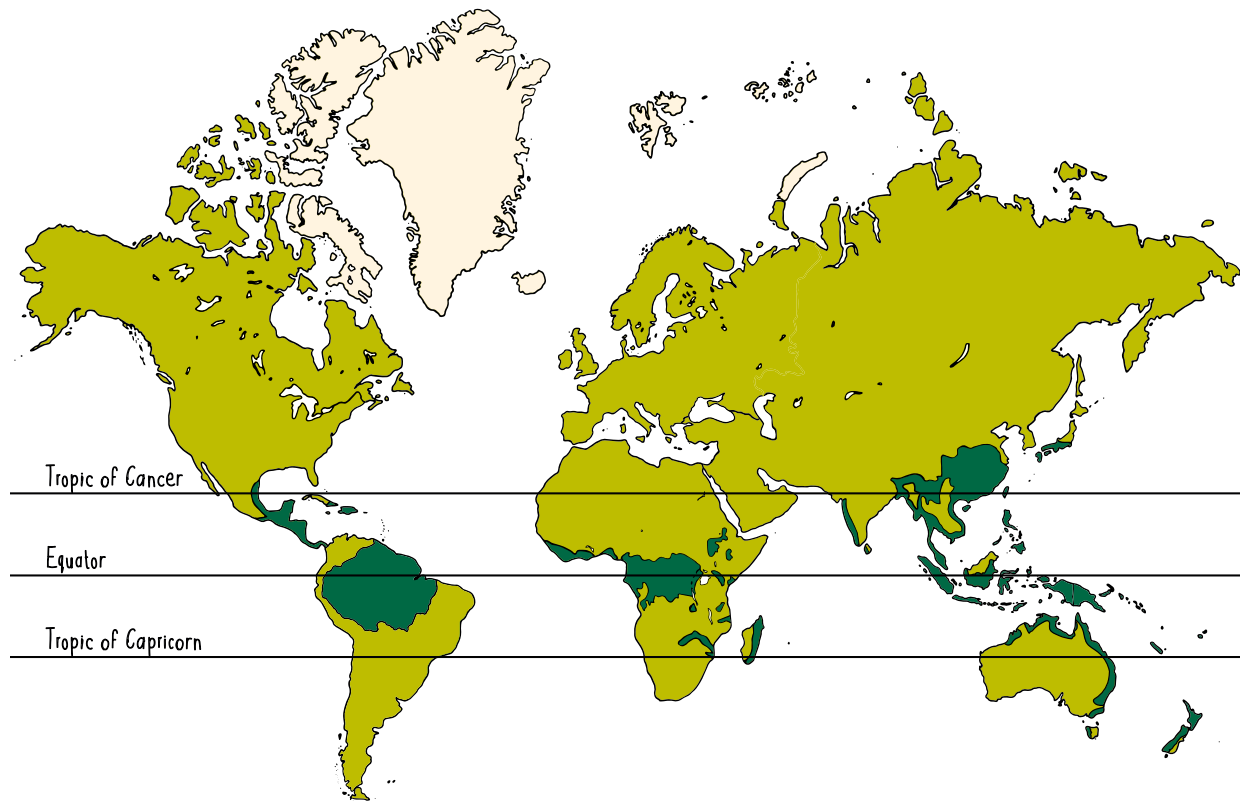

The region of the Earth nearest to the Equator is called The Tropics.

The tropics has the greatest exposure to the sun as it shines most directly on this part of the Earth.

Tropics of Cancer and Capricorn

The wettest areas are those closest to the **Equator**, where tropical rainforests are found. There is a great amount of rainfall throughout the year. It is drier in tropical regions further north or south of the Equator, where there may be wet and dry seasons.

The large amount of sunlight energy and water is converted by plants into new plant material. This provides energy for animals that feed on the plants and other animals that, in turn, feed on these animals.

Where are tropical rainforests in the world?

Bornean
orangutan

Sumatran
orangutan

I am found in the rainforests
of Borneo and Sumatra

Jaguar

I am found in the rainforest
of Brazil

Possum

I am found in the rainforest
of Australia

Ecuador Amazon Parrot

I am found in the rainforest
of Ecuador

Llama

I am found in the rainforest
of Peru

Sloth

I am found in the rainforest
of Brazil

Giant anteater

I am found in the rainforest
of Guyana

Spider monkey

I am found in the rainforest
of Venezuela

River dolphin

I am found in the rainforest
of Bolivia

Anaconda

I am found in the rainforest
of Mexico

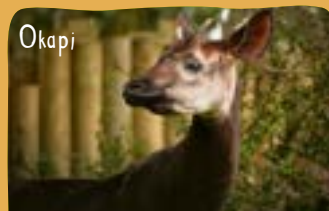

Chimpanzee

I am found in the rainforest
of Cameroon

Brown banana frog

I am found in the rainforest
of Ghana

Okapi

I am found in the rainforest
of Congo

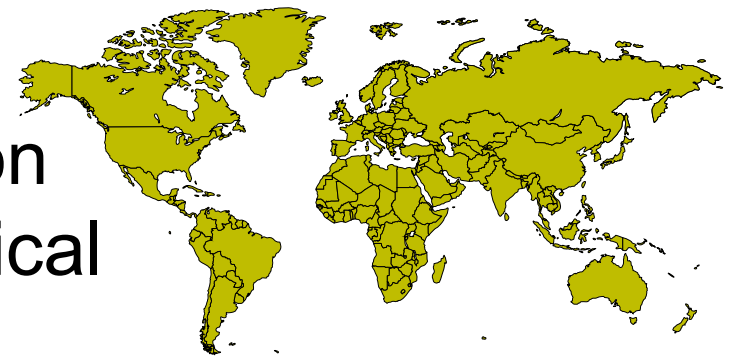

Gorilla

I am found in the rainforest
of Gabon

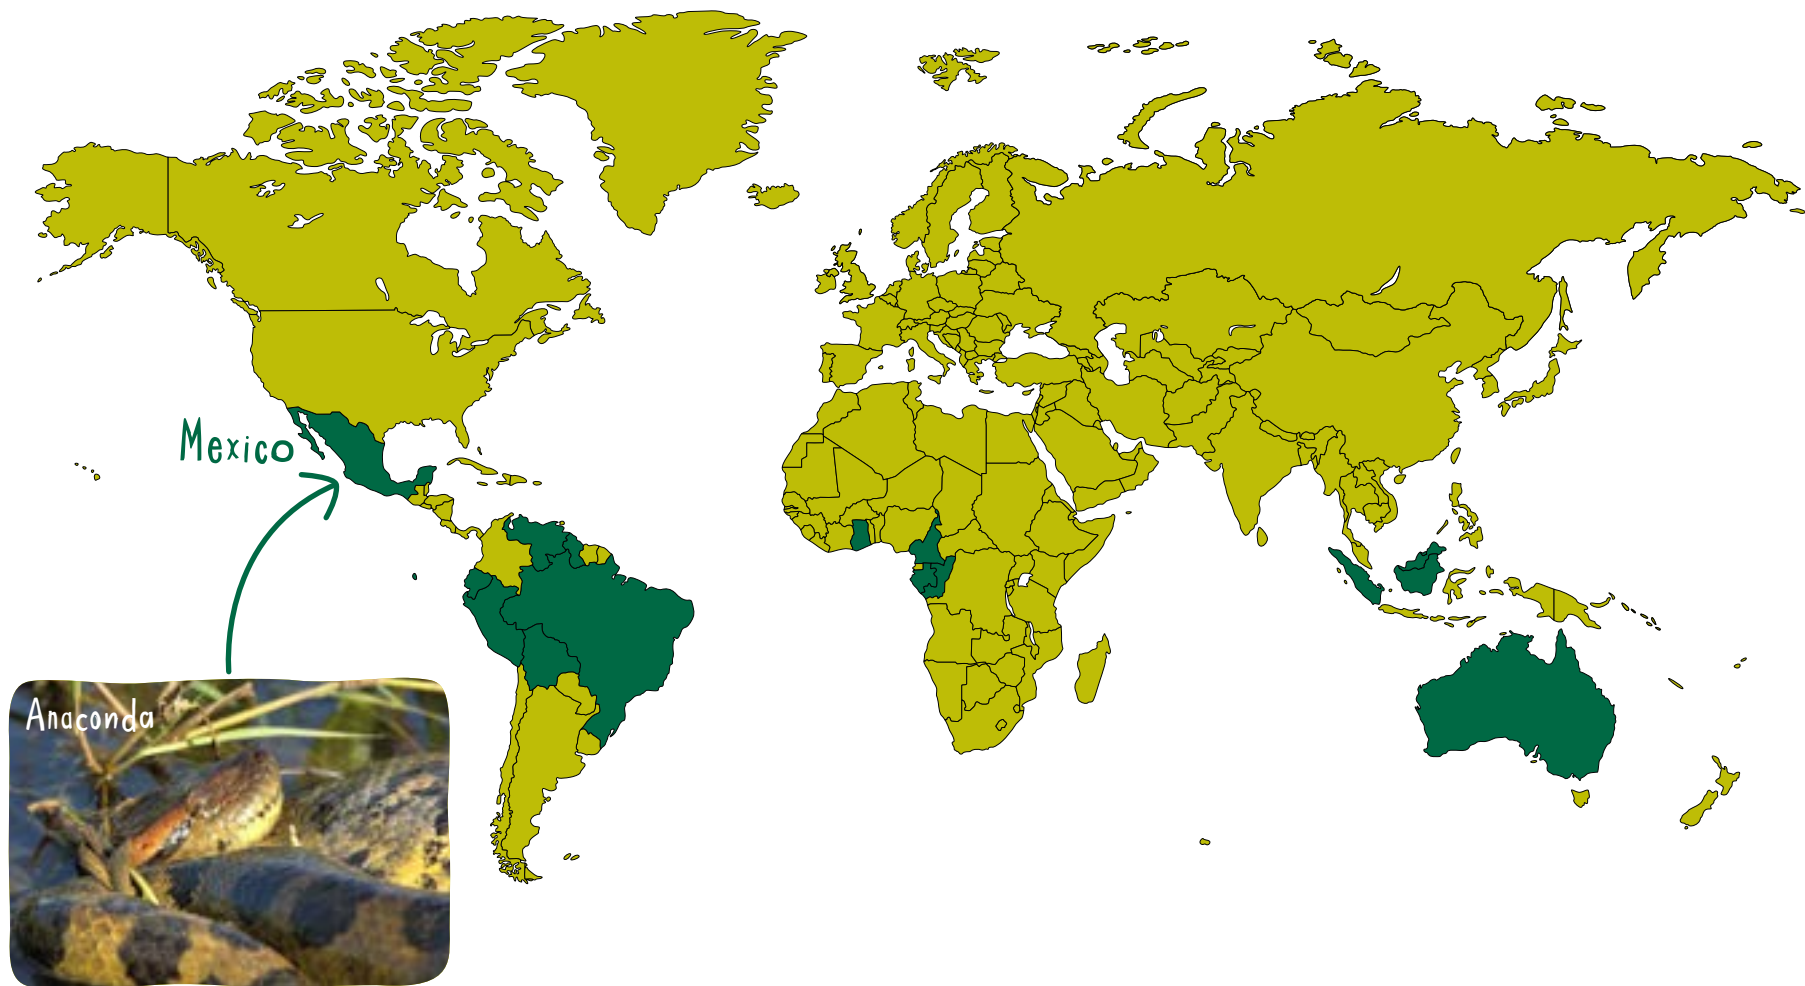

N.B. Some of these animals
are also found in other
countries too.

Where are tropical rainforests found in the world - activity

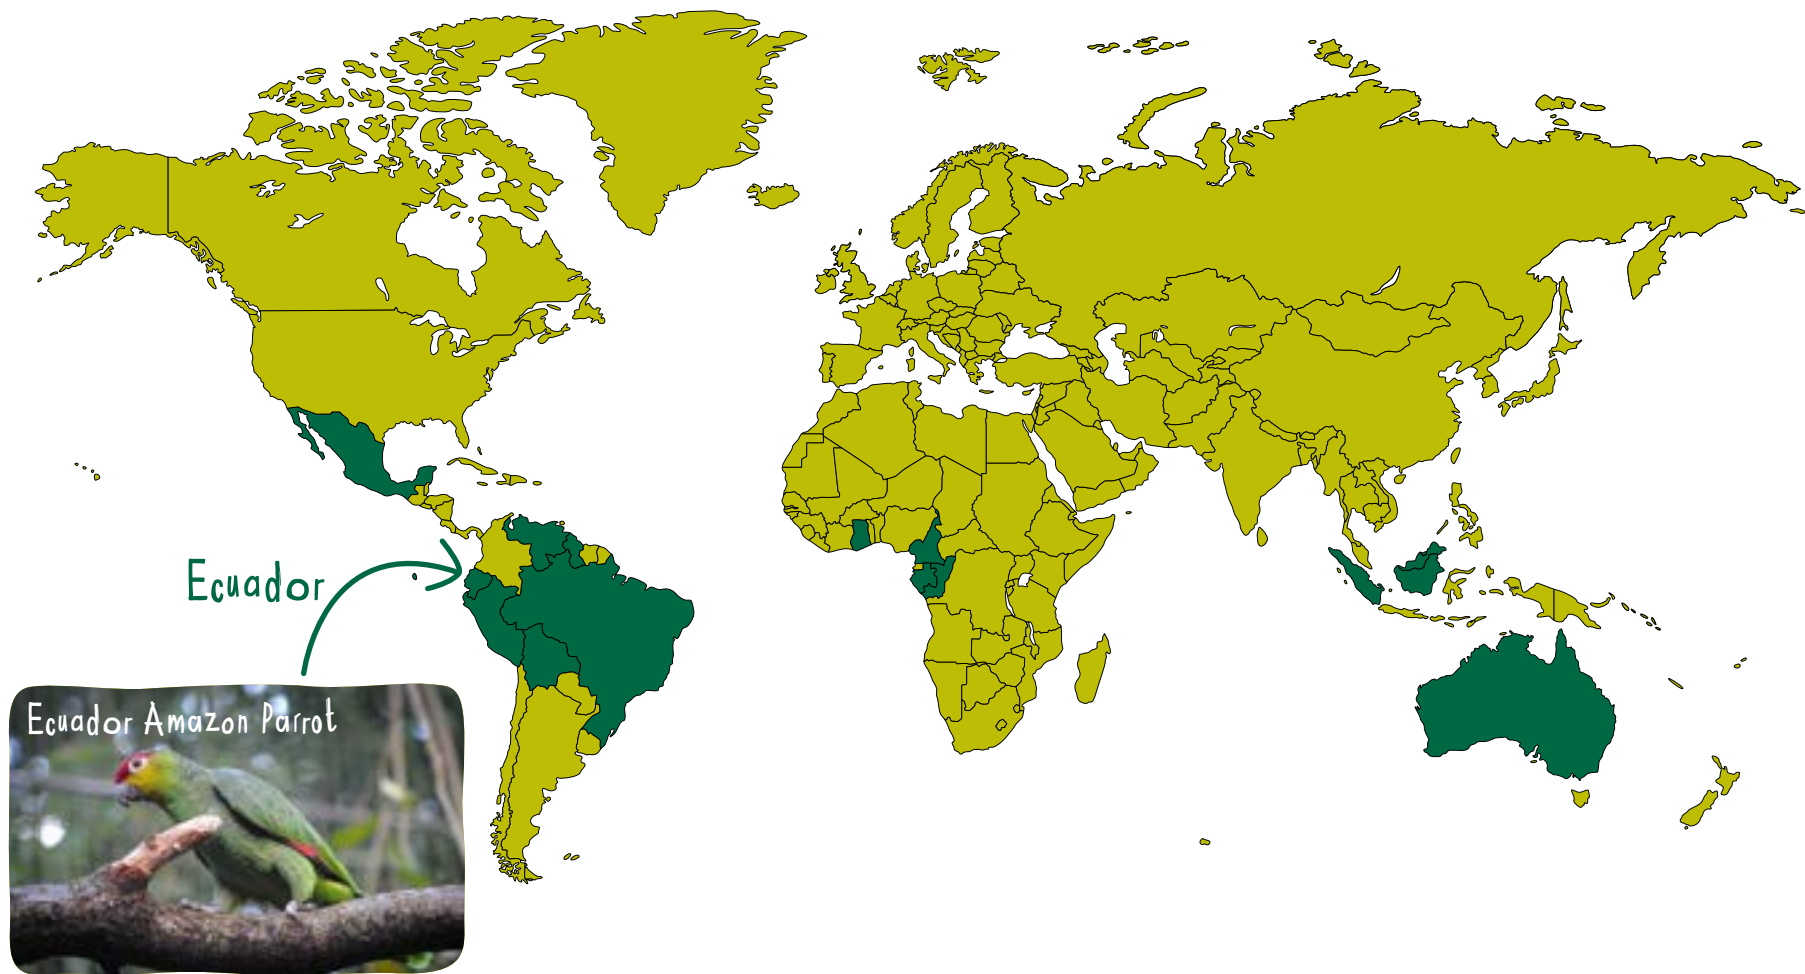

- Use the cards of animals who live in different tropical rainforests in the world to identify in which countries the tropical rainforests are found.
- Use an atlas/ world map to find these countries and write them on your worksheet: 'Where are tropical rainforests found in the world?'
